

Were credentials provided when the project was added?	Was 'Use cached credentials if available' checked when the project was added?	Are there Subversion credentials cached for the user running Continuum?	Were credentials provided during release prepare?		Initial project add	Scheduled or Forced Build	Release
Y	Y	Y	Y		use the provided credentials for the HTTP GET to retrieve the POM. Do not store the credentials in the database because the checkbox says we should rely on cached credentials.	Rely on the cached credentials [2]	use the credentials provided during release prepare. Avoid caching these credentials. [1]
Y	Y	Y	N		"	"	Rely on the cached credentials [2]
Y	Y	N	Y		"	Rely on the cached credentials [2]. Will probably fail because they are missing.	use the credentials provided during release prepare. Avoid caching these credentials. [1]
Y	Y	N	N		"	"	Rely on the cached credentials [2]. Will probably fail because they are missing.
Y	N	Y	Y		use the provided credentials for the HTTP GET to retrieve the pom. Store the credentials in the database for later use.	Use the credentials from the database [3]	
Y	N	Y	N		"	"	
Y	N	N	Y		"	"	
Y	N	N	N		"	"	
N	Y	Y	Y				
N	Y	Y	N				
N	Y	N	Y				
N	Y	N	N				
N	N	Y	Y				use the credentials provided during release prepare. Avoid caching these credentials. [1]
N	N	Y	N				Rely on the cached credentials [2]
N	N	N	Y				use the credentials provided during release prepare. Avoid caching these credentials. [1]
N	N	N	N		Do not provide credentials for the initial POM retrieval.	Rely on unauthenticated access to the svn repo	Rely on unauthenticated access to the svn repo

Implementation notes:

[1] Use --no-cache-credentials on the svn command line

[2] Do not provide --username and --password on the svn command line

[3] Provide --username and --password on the svn command line
